

## **Febeliec answers to the Elia public consultations on the CRM capacity contract & Connection contract**

### **Febeliec answers to the Elia public consultations on the CRM capacity contract**

Febeliec at this point has no punctual comments on this consultation. This should however not be interpreted as agreement of Febeliec with the proposal. Febeliec reserves itself the right to come back on its position in the future in light of new observations.

### **Febeliec answers to the Elia public consultations on the Connection contract**

With respect to art.14 on financial guarantees, Febeliec thanks Elia for the inclusion of an alternative solution for CDSs in art.14.1.4 an (in all their types). Febeliec however proposes to extend the scope to all grid users (non-CDS) in case the generation capacity for which a financial guarantee has to be given is not owned directly by the grid user (as their situation is similar to that of a CDSO in this matter). Febeliec also wants to point to the punctual comments that are made by one of its members, which Febeliec supports.
